Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

1. Claims 17 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 17 and 21, the phrase "a minimum reflectivity which is 0.5% or lower" rendering the claims indefinite, because the relationship between minimum and lower is unclear. Clarification is required.

***Claim Rejections - 35 USC § 102***

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-6, 12-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Anderson et al (US 5714268).

It is noted by the Examiner that some claims involve processing steps. Applicant is reminded that it is the product itself which must be new and unobvious. In re Pinkington 162 USPQ 145, 147 (CCPA 1969). Unless some unexpected result is shown that occurs due to Applicant's specific process, different processing steps are not patentability distinguishing for claims to an article.

Anderson discloses a thin film substrate comprised of a glass substrate and metallic coatings. The metallic coatings are coated over onto the glass substrate for optimal light transmission and light reflection.

Art Unit: 1775

Tantalum is first coated onto the glass substrate, followed by a second metallic coating which can be  $\text{Fe}_2\text{O}_3$  and CoO coating (col 4 L 8-16). The second metallic coating can also be a tin material (col 5 L 55-62). Anderson has no mentioned of including chromium in the metallic coatings, thus Anderson's teaching anticipates the present invention.

Absent evidence to the contrary the properties the compositionally similar structures would inherently be the same as those claimed in the present applicant meeting the limitations of claims 17 and 21.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cathy Lam whose telephone number is (571) 272-1538. The examiner can normally be reached on 9am-6pm.
